

501 Queen Headways at Lakeshore Humber Westbound Morning

501 Queen Headways at Lakeshore Humber Westbound Middy

501 Queen Headways at Lakeshore Humber Westbound Afternoon

The chart displays headways in minutes for six time slots: 15:00, 16:00, 17:00, and 18:00, each with a solid line for the actual headway and a dotted line for the standard deviation (SD). The y-axis ranges from 0 to 20 minutes. The x-axis shows weeks from 2015.03 Wk 1 to 2016.01 Wk 4. The 15:00 slot shows a significant peak in headway (around 16 minutes) in early April 2015. The 16:00 slot shows a sharp spike in SD (around 20 minutes) in late October 2015. The 17:00 and 18:00 slots show more stable headways, with the 18:00 slot peaking around 15 minutes in late December 2015.

Timeline of the day with color-coded segments for different activities:

- 15:00 (Red solid line)
- 15:00 SD (Red dotted line)
- 16:00 (Orange solid line)
- 16:00 SD (Orange dotted line)
