TORONTO TRANSIT COMMISSION

Service Summary

November 1 to December 19, 2026

Data compiled by the Service Planning and Scheduling Department

SERVICE SUMMARY – Introduction

This document summarizes all transit services operated by the Toronto Transit Commission for the period shown. It includes all rapid transit, streetcar, bus, and community bus routes.

For each route, the summary lists the route name and destinations, the garage or carhouse responsible for the service, key service details, and first and last trip times. Scheduled headway is shown for each route, along with a combined or average headway where multiple branches operate. The summary also includes the number and type of vehicles assigned, the round-trip driving time, total terminal time, and the average operating speed of the route (based on driving time only and excluding terminal time).

The first and last trip times shown reflect trips that operate over the full length of each branch. Some routes may have earlier or later trips that operate over only part of the route; these partial trips are not included.

Notes are included for routes that interline with other routes, are temporarily operating on scheduled diversion, or are temporarily operated by buses instead of streetcars.

Service frequencies are shown in minutes and seconds. Running times and terminal times are shown in minutes. Distances are shown in kilometres, and speeds are shown in kilometres per hour.

This document also provides a summary of vehicles and trains operated by time period, a complete list of TTC routes (shown alphabetically, numerically, and by division), a list of connections at rapid transit stations, and a list of transit vehicles.

This document is available on the TTC website **here**, and on the internal TTC Intranet (Internal-TTC access only) **here**.
